

Back to life

I'm not going along with this.

I refuse.

I say no.

These sentences of Gunnar Kaiser are the basis for my thoughts for the following contribution.

For 15 months now we are supposed to be banished by means of the Corona nose ring into a "New World Order" which we, if we are still in our right mind, do not want.

There is a handful of power-obsessed, self-important and unscrupulous psychopaths who call themselves philanthropists (philanthropists) who have staged a large-scale human experiment by means of Sarscov-2 with the largely financed and equally power-addicted governments and parts of science.

It is, as it is clear to conscious people, a perfection of previous "pandemic" experiments such as SARS, MERS, bird flu, swine flu which all served to manifest the fear in the minds of the people for the large-scale attack.

As you can see, this worked really well.

We are not going along with it.

We refuse.

We say no.

And we say it now! And more and more! And louder and louder!

Do we want, the children's laughter to be stolen and make them to do and say only what OTHERS want, as if remote-controlled?

I don't have children but I don't want that!

Do we want our old people to be the closest and the strangers to be locked away for their own supposedly well-intentioned safety and die a lonely death unnoticed by anyone?

I do not want that and I say loudly NO!

Do we want that we are trimmed in such a way that we shuffle empathyless and dully obedient through life always with the fear in the neck to be denounced?

I don't want that even if the biggest part of my life is already behind me!

I want to LIVE, freely decide what I do when and how, where and with whom I go. And therefore I say:

I do not go along with it.

I refuse.

I say no.

Thoughts become words and words become actions. So let's turn our words into actions and let's manifest those words all over the planet, our Mother Earth.

We cannot wait for the Savior - He is waiting for us - and we must set out together to bring back the light of peace.

We want to do it.

We can do it.

We will do it now.

I thank Gunnar Kaiser for unwittingly giving the impetus for this article with his words.

Lightful greetings to all who want to join this way.
Helga
